

RackScale Modular MicroServer S-200

Document ID: TDS-RS-S200-2026 | Revision: 1.4 | Classification: Commercial Product Sheet

Product Overview

The RackScale S-200 is an edge-optimized compute server designed for micro data centers, branch offices, and distributed inference applications. Built with thermal efficiency and redundant power supply rails.

Technical Specifications

Attribute	Specification Detail
Processor	AMD EPYC Embedded 7232P (8 Cores, 16 Threads, 3.1 GHz Base)
Memory Capacity	32 GB ECC DDR4-3200 Registered RDIMM (Max 128 GB across 4 DIMMs)
Storage Controller	Integrated 8-port SAS/SATA RAID Controller (Hardware RAID 0, 1, 5, 10)
Storage Bays	4x 3.5" or 2.5" Hot-Swap SATA/SAS Drive Bays
Network Interface	Dual 10GbE SFP+ Ports + Dual 1GbE RJ-45 Onboard
Form Factor	1U Rackmount (Depth: 550mm)

Procurement & Compliance

Unit Commercial Price: ₹1,45,000 (Standard Configuration). Enterprise purchase instructions require administrative authorization from regional systems leads before delivery staging. TPM 2.0 cryptoprocessor included for secure boot.
